

Streets and Drains Information
March 2008

Members

Harley Logsdon Jim Blache Mike Hersey Rich Burna

No formal meeting was held by this committee in March. During the month the committee answered questions regarding the west bridge repair project and consulted with several homeowners regarding driveway flooding and swale repair projects.

In a recent conversation with RCMG it was relayed that the City now has 4 proposals on how to repair the bridge. It is expected that approval of one of these plans will be made during the second week of April.

It is further anticipated that work on the portion of the canal not associated directly with bridge repair will commence the first week in April.

Future Streets and Drains meeting will discuss rebidding repair of the nature trail, additional swale repair projects and again street repaving.
